

SE Boot Camp Assignment 5

Create a JavaScript file (link it to an HTML file), and write code for below 3 tasks:

A.

Class Activity:

Apply loop and array (can be within a function) to calculate your average score of assignment 1,2,3,4, project1 and project2.

B.

Class Activity:

Create a function that can covert a varied number of Celsius (from users' inputs) to Fahrenheit.

Note: only covert temperature between -88 Celsius and 58 Celsius

C.

Show at least 3 buttons on HTML page as below. Clicking on any of the three buttons will open the same modal window. Apply JavaScript ONLY to open/close the modal window.
